**Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## User Stories

Use the below template to list all the user stories for the product.

| User Type              | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                         | Acceptance criteria                                         | Priority | Release  |
|------------------------|-------------------------------|-------------------|-----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|----------|----------|
| Customer (Mobile user) | Registration                  | USN-1             | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard                         | High     | Sprint-1 |
| Customer (Mobile user) | Registration                  | USN-2             | As a user, I will receive confirmation email once I have registered for the application                   | I can receive confirmation email & click confirm            | High     | Sprint-1 |
| Customer (Mobile user) | Registration                  | USN-3             | As a user, I can register for the application through Facebook                                            | I can register & access the dashboard with Facebook Login   | Low      | Sprint-2 |
| Customer (Mobile user) | Registration                  | USN-4             | As a user, I can register for the application through Gmail                                               | I can register for the application through Gmail            | Medium   | Sprint-1 |
| Customer (Mobile user) | Login                         | USN-5             | As a user, I can log into the application by entering email & password                                    | I can log into the application by entering email & password | High     | Sprint-1 |
| Customer (Mobile user) | Working with Dataset          | USN-6             | As a user, I can able to work with Dataset                                                                | I can able to understand and load the dataset               | High     | Sprint-2 |
| Customer (Mobile user) | Data Visualizing Charts       | USN-7             | As a user, I can able to visualize the data into charts                                                   | I can able to visualize the data into charts                | Medium   | Sprint-2 |
| Customer (Mobile user) | Creating the Dashboard        | USN-8             | As a user, I can able to create the Dashboard                                                             | I can able to create the Dashboard                          | Medium   | Sprint-3 |
| Customer (Mobile user) | Exporting Analytics           | USN-9             | As a user, I can export the analytics                                                                     | I can able to export the analytics and find the crop yield  | High     | Sprint-3 |
